Wucu — the whole week, now on Mac

All seven weekday apps — Mōnandæg to Sunnandæg — are now on the Mac, as standalone apps, Audio Units and VST3 plug-ins. **Wucu** is the bundle: one installer, the whole week.

These are not cut-down versions. Each day is the full instrument from iPhone and iPad, brought over and made a little newer for the desk: patch cables where there were switches, a keyboard and a SYNTH mode for playing notes, the Mac's camera to move the pads, and — on Monday, Tuesday, Thursday and Friday — an effect version that runs whatever is on the track through it.

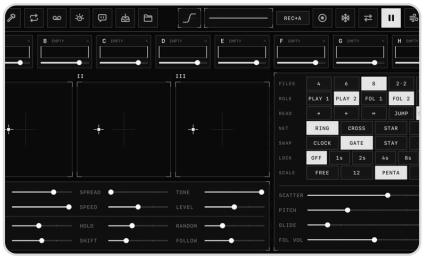

WHAT YOU GET

One .pkg installer — choose any of the seven
Standalone app · AUv3 · VST3
Logic, GarageBand, Live, Bitwig, Reaper …
macOS 12 or later · Apple silicon and Intel

10% OFF UNTIL BLACK FRIDAY

WUCU10

at checkout on Gumroad · until 27 November

Mōnandæg

Monday · Instrument + FX

Eight takes, one fold

Up to eight recordings read by a net of gates and folded in three stages. FREEZE, BREAK, LOOP, TEXTURE, SEND, SPEAK and PRESET.

Mac guide ↓

Tīwesdæg

Tuesday · Instrument + FX

Two decks, crossed

Two sound files read as oscillators, cut to 0/1 and crossed through two registers. Struck peaks, two pianos, six effects.

Mac guide ↓

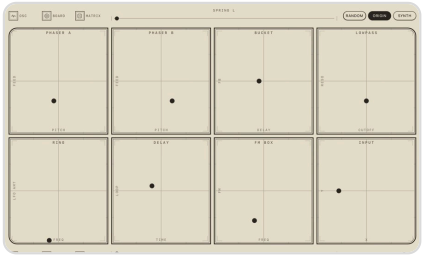

Wōdnesdæg

Wednesday · ORIGIN · SYNTH

Sixty-four sines, one chord

A drone of 64 sines, drawn by hand and held on a chord — or eight voices from the keys.

Mac guide ↓

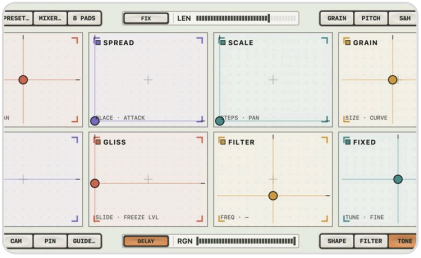

Þunresdæg

Thursday · Instrument + FX

Equations on a board

Map oscillators patched by cable into phasers, a bucket delay, seven pedals and a matrix — or played from the keys.

Mac guide ↓

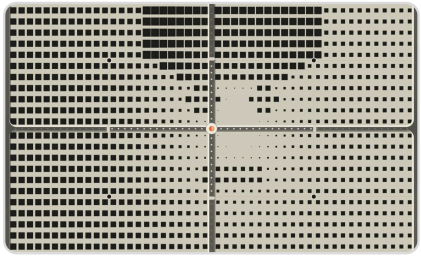

Frīgedæg

Friday · Instrument + FX

Grains over a recording

Eight pads read a recording back as grains. RENTHOUSE: a ring of five and two reels keep it moving.

Mac guide ↓

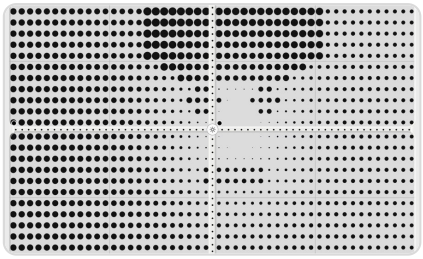

Sæternesdæg

Saturday · ORIGIN · SYNTH · MODULAR

One oscillator, fed back

Two oscillators, XOR, pulsar and a shaper, fed back into themselves.

Mac guide ↓

Sunnandæg

Sunday · ORIGIN · SYNTH · MODULAR

One sine, three folds

A sine folded three times, with Twin Peak, Resonant EQ and Comb, patched by cable.

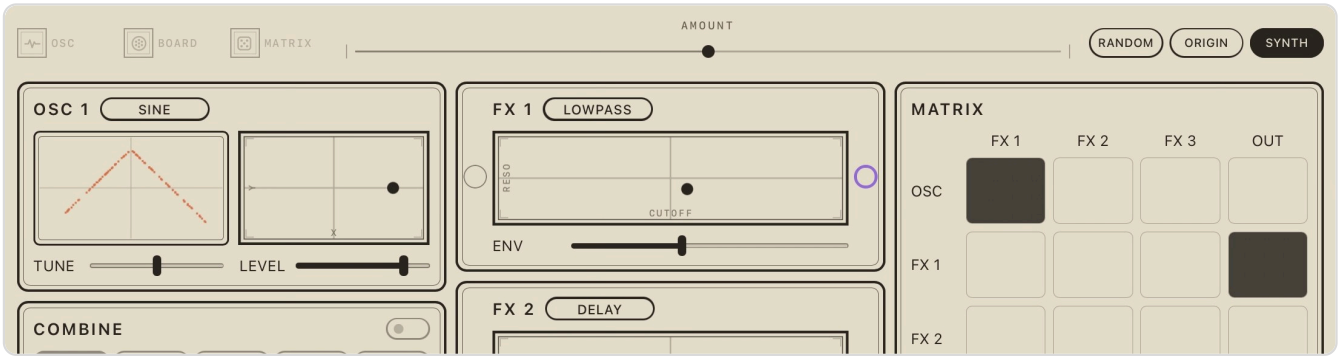

Mac guide ↓

ALSO ON GUMROAD

Each day on its own, if one is enough. **Shoal** — four synths that play each other. **Biga** — two circuits on one board. Together as **Shoal + Biga**.

Every guide, app and link on one page: keiodak.github.io/privacy/links.html

Windows VST3 versions will follow, once they have been tested on real machines.

Þunresdæg in SYNTH mode — two equation oscillators played from the keys, through three effect slots and a matrix.

Thank you for following along. I make all of this alone; if something isn't working, or you have an idea, write to kodk.dev@gmail.com.
